DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows: **In the Claims**: Please cancel claims 28-45 for being drawn to an invention non-elected without traverse.

Response to Amendment

3. Applicant's amendment filed 22 September 2003 has been entered and overcomes the Examiner's objections to the drawings and specification.

Allowable Subject Matter

4. This application is in condition for allowance except for the presence of claims 28-45 drawn to an invention non-elected without traverse. Accordingly, claims 28-45 have been cancelled.
5. Claims 1-27 and 46-51 are allowed.
6. The following is an examiner's statement of reasons for allowance: Applicant argues that the applied prior art (Kim) does not teach or suggest a rib having a conductive material that is electrically connected to the second electrode of the display apparatus as claimed in the instant application, since it is disclosed in the prior art that the ribs are electrically insulating. Applicant's argument is persuasive.

Art Unit: 2879

7. Thus, regarding independent claim 1, the prior art of record neither shows or suggests a display apparatus having, in addition to other limitations of the claim, a plurality of pixels partitioned by a rib larger in thickness than a light-emitting layer and having at least a conductive material, wherein the conductive material is electrically connected to a second electrode. Due to their dependency upon independent claim 1, claims 2-12 and 46-51 are also allowable.

8. Regarding independent claim 13, the prior art of record neither shows or suggests a display apparatus having, in addition to other limitations of the claim, a plurality of pixels partitioned by a rib larger in thickness than an organic layer and having at least a conductive material, wherein the conductive material is electrically connected to an upper electrode. Due to their dependency upon independent claim 13, claims 14-27 are also allowable.

9. The subject rib having a conductive material, as described earlier, is provided for ensuring sufficient luminous intensity of the device and allowing improved display properties. The design is new and unique to the art.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
